1. Naturalization statistics are estimates based on data from the Department of Homeland Security. For the nationwide total, we impute missing data for FY2024 based on a 50-year trend in naturalizations using ordinary least squares regression to make a linear prediction with adjustments for outlier years.
2. Region-of-the-world distributions calculated using latest publicly-available DHS data from FY2022.
3. Country-of-origin distributions calculated using latest publicly-available DHS data from FY2023.
4. Age and gender distributions calculated using latest publicly-available DHS data from FY 2023.
